

2.6.1 Any Additional Information (Co, PO attainment process displayed)

MORADABAD INSTITUTE OF TECHNOLOGY
Ram Ganga Vihar, Phase II, Moradabad, Uttar Pradesh 244001

Department of Computer Science & Engineering

PROGRAM OUTCOMES (POs)

- PO1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.
- PO2: Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, scientific evidence, and engineering concepts.
- PO3: Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consequences.
- PO4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions and interpretations of data.
- PO5: Modern tool usage: Use modern tools including professional software, computers, and modern engineering and IT tools including professional and modeling to complex engineering activities with an understanding of the limitations.
- PO6: The engineer and society: Apply reasoning related to the engineering knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO7: Environment and sustainability: Understand the impact of the professional engineering solution in societal and environmental contexts, and demonstrate the knowledge of, and need for, sustainable development.
- PO8: Ethics: Apply ethical principles and conduct to professional advice and responsibilities and norms of the engineering practice.
- PO9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams and in multidisciplinary settings.
- PO10: Communication: Communicate effectively in complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's work as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO12: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

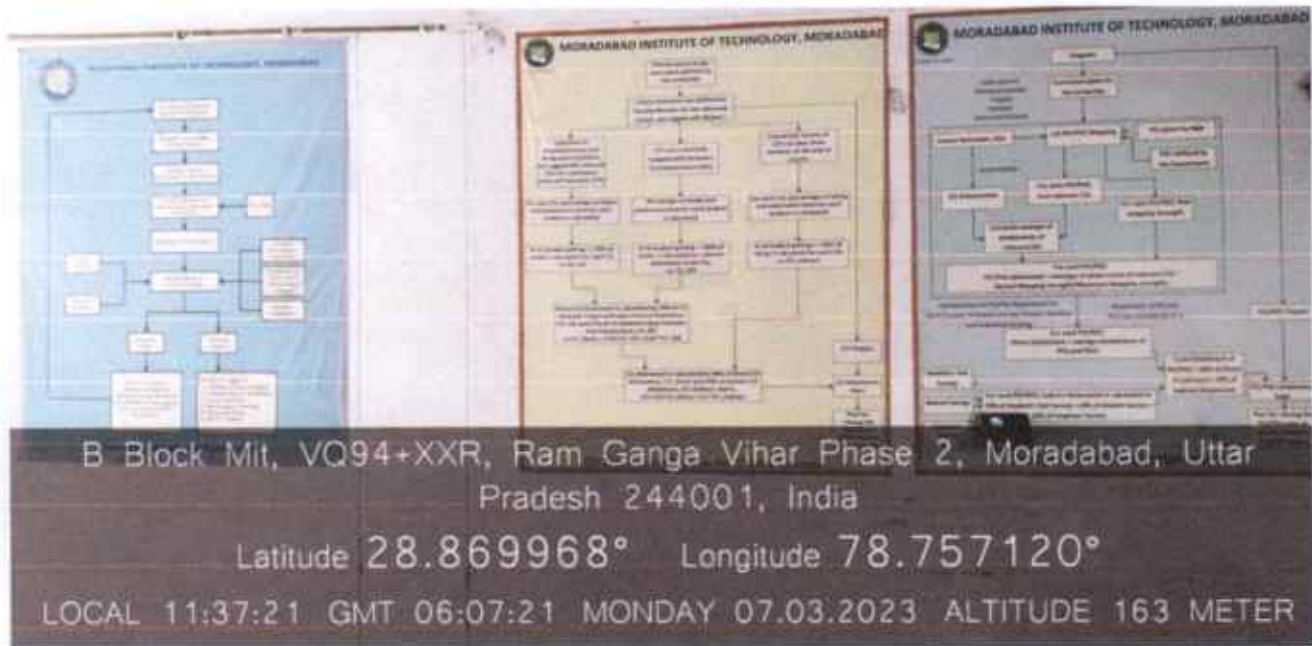

PROGRAM SPECIFIC OUTCOMES (PSOs)

- PSO1: Comprehend the vital software of C++ and apply them to solving domain specific applications.
- PSO2: Synthesize the fundamental concepts in engineering and to apply their knowledge with programming language skills to develop new, innovative and maintain software products.
