(SEM IV) THEORY EXAMINATION 2021-22 HYDRAULIC ENGINEERING AND MACHINES

Time: 3 Hours

Total Marks: 100

- Notes:
 - Attempt all Sections and Assume any missing data.
 - Appropriate marks are allotted to each question, answer accordingly.

SECT	ION-A	Attempt All of the following Questions in brief	Marks (10X2=20)	CO
Q1(a)	Define sp	ecific energy and total energy.		1
Q1(b)	Distinguis	sh between pipe flow and open channel flow.		1
Q1(c)	Distinguis	sh between most economical and most efficient chann	el.	2
Q1(d)	Explain G	VF.		2
Q1(e)	e) Explain hydraulic jump with the help of a diagram.			
Q1(f)	Define surges in open channel.			
Q1(g)	Explain S	peed ratio and Jet ratio of a Pelton turbine.		4
Q1(h)	Define pu	mps.		4
Q1(i)	Define rea	action turbine with the help of a suitable example.		5
Q1(j)	Define sp	ecific speed of a turbine.		5

SECT	ION-B	Attempt ANY THREE	of the following Questions	Marks (3X10=30)	CO
Q2(a)	Illustrate	the condition under whi	ich the rectangular and triang	ular section of an open	1
	channel is	most economical and	derive these conditions.	-	
Q2(b)	Explain a	nd sketch the GVF prof	files produced on	0	2
	i. Mild Sl	ope ii. Steep Slope	iii. Critical Slope		D .
Q2(c)	A hydraul	ic jump is occurring in	a rectangular channel of 3 m	width, discharge is 7.8	3
	m^3/s and c	lepth before the jump is	s 0.28 m. Calculate:	<u>_</u>	
	i. Sequent	Depth	7.6	05	
	ii. Energy	loss during the jump		25.	
Q2(d)	Illustrate of	centrifugal pump? Desc	ribe the principle and working	g of a centrifugal pump	4
	with a nea	ıt sketch.			
Q2(e)	Illustrate	the phenomenon of cav	itation? What is its effect on t	urbine? How it can be	5
	avoided?	-)~	
	•		<u></u>		

SECTION-C		Attempt ANY ONE following Question	Marks (1X10=10)	CO
Q3(a) Explain the concept of specific		he concept of specific energy depth curve and p	rove the critical flow	1
		for all types of channels.		
Q3(b) A flow of 5		5 m^3 /s is passing at a depth of 1.5 m through a rectar	gular channel of 2.5 m	1
	width. The kinetic energy correction factor α is found to be 1.20. What is the spec		20. What is the specific	
energy of the flow? What is the value of the depth alternate to the existing depth				
	= 1.0 is as	sumed for the alternate flow?		

SECT	ION-C	Attempt ANY ONE following Question	Marks (1X10=10)	CO
Q4(a)	Q4(a) A rectangular channel has a width of 2 m and carries a discharge of 4.8 m ³ / sec w		rge of 4.8 m^3 / sec with	2
	a depth of 1.6 m. At a certain section a small smooth hump with a flat top and of height		a flat top and of height	
	0.5 m is p	roposed to be built. Neglect energy loss.		
	i. Calcula	te the water surface elevation on the hump.		
	ii. Calcula	ate the minimum size of hump to cause critical flow of	over the hump.	
Q4(b)	A rectang	ular channel is 3.5 m wide and conveys a discharge of	of 15 m ³ /s at a depth of	2
	2 m. It is	s proposed to reduce the width of the channel at	a hydraulic structure.	
	Assuming	the transition to be horizontal and the flow to be fric	tionless, determine the	
	water sur	face elevation upstream and downstream of the	constriction when the	
	constricte	d width is: (i) 2.5 m, (ii) 2.2 m.

(SEM IV) THEORY EXAMINATION 2021-22 HYDRAULIC ENGINEERING AND MACHINES

SECT	ION-C	Attempt ANY ONE following Question	Marks (1X10=10)	CO
Q5(a)	5(a) Derive an expression for sequent depth ratio and energy loss in a hydraulic jum		a hydraulic jump for a	3
	rectangula	r channel.		
Q5(b)	whether a	tal rectangular channel 4 m wide carries a discharge jump may occur at an initial depth of 0.5 m or the sequent depth to this initial depth. Also determine	not. If a jump occurs,	
SECT	ION-C	Attempt ANY ONE following Question	Marks (1X10=10)	CO

SECT	ION-C	Attempt ANY ONE following Question	Marks (1X10=10)	CO	
Q6(a)	Explain ir	detail the working of a reciprocating pump with	the help of a suitable	4	
	diagram.				
Q6(b)	A nozzle o	of 50 mm diameter delivers a stream of water at 20	m/s perpendicular to a	4	
	plate that	moves away from the jet at 5 m/s. Calculate:			
	i. Force o	n the plate			
	ii. Work d	one			
	iii. Efficie	ncy of the jet			

SECT	ION-C	Attempt ANY	ONE following	Question	Marks (1X10=10	D) CO
Q7(a)		draft tubes and	its types with		diagram. Prove that the pressure.	ne 5
Q7(b)	A Pelton KW, Hea to exceed i. Wheel ii. No. of iii. Diamo	wheel is to be do d = 380 m, Speel l one-sixth of wh	esigned for the ed = 750 rpm, (neel diameter (following specification Overall Efficiency = 8	on. Shaft Power =1172 6%, Jet diameter (d) n
