BTECH
(SEM VI) THEORY EXAMINATION 2021-22
ENVIRONMENTAL ENGINEERING

Time: 3 Hours**Total Marks: 100****Note:** Attempt all Sections. If you require any missing data, then choose suitably.**SECTION A****1. Attempt all questions in brief.****2*10 = 20**

Qno	Questions	CO
(a)	Define "per capita demand"?	1
(b)	Define "Design Period"?	1
(c)	Explain the function of distribution reservoir.	2
(d)	What is 'Reservoir yield'?	2
(e)	What guidelines EPA has set for suspended solids?	3
(f)	Define 'dissolved material'?	3
(g)	Differentiate between Unit Operation & Unit Process?	4
(h)	What is the difference between "Disinfection" & "Sterilization"?	4
(i)	Explain Aerobic decomposition?	5
(j)	Define wastewater treatment?	5

SECTION B**2. Attempt any three of the following:****10*3 = 30**

Qno	Questions	CO
(a)	Explain the suitability of any four population forecasting methods?	1
(b)	Explain with neat sketch any one type of surface reservoir?	2
(c)	Explain in detail about organics in wastewater?	3
(d)	A rectangular settling tank is to treat 1.8 million litres per day of raw water. The sedimentation period is to be 4 hours, the velocity of flow 8 cm/minute, and the depth of the water and sediment 4.2 m. If an allowance of 1.2 m for sediment is made, what should be Length and Width of the basin.	4
(e)	Briefly explain the working of Trickling Filter?	5

SECTION C**3. Attempt any one part of the following:****10*1 = 10**

Qno	Questions	CO												
(a)	<p>The population of a city obtained from the census report is as given below:</p> <table border="1" style="width: 100%; text-align: center;"> <tr> <td>Year</td> <td>1960</td> <td>1970</td> <td>1980</td> <td>1990</td> <td>2000</td> </tr> <tr> <td>Population</td> <td>80000</td> <td>120000</td> <td>168000</td> <td>228000</td> <td>250000</td> </tr> </table> <p>Calculate the population of the city for the year 2030 by Arithmetical increase method, geometric increase method and by Incremental Increase method.</p>	Year	1960	1970	1980	1990	2000	Population	80000	120000	168000	228000	250000	1
Year	1960	1970	1980	1990	2000									
Population	80000	120000	168000	228000	250000

BTECH
(SEM VI) THEORY EXAMINATION 2021-22
ENVIRONMENTAL ENGINEERING

(b)	Estimate the hydraulic gradient in 2 m dia. Smooth concrete pipe carrying a discharge of 3 cumecs at 10 ⁰ C temperature by (a) Darcy-Weisbach formula (b) Hazen-William's formula. Assume all suitable data	1
-----	---	---

4. Attempt any *one* part of the following: 10 *1 = 10

Qno	Questions	CO
(a)	Illustrate with sketches the different types of layouts of pipe systems in distributing water?	2
(b)	Differentiate between gravity and pressure conduits? Pressure conduits are commonly used for conveying water from distant sources to the town for supply, explain why?	2

5. Attempt any *one* part of the following: 10*1 = 10

Qno	Questions	CO
(a)	A sample of wastewater has a 4- day 20 ⁰ C BOD value of 75% of final. Find the reaction constant per day?	3
(b)	For a wastewater sample, 5 -day BOD at 20 ⁰ C is 200 mg/lit and is 67% of the ultimate. What will be 4-day BOD at 30 ⁰ C	3

6. Attempt any *one* part of the following: 10*1 = 10

Qno	Questions	CO
(a)	Determine the quantity of alum required in order to treat 13 million litres of water per day at a treatment plant, where 12 ppm of alum dose is required. Also determine the amount of CO ₂ gas which will be released per litre of water treated.	4
(b)	It is required to supply water to a population of 20,000 at a per capita demand of 150 lpcd. The disinfection used for the chlorination is bleaching powder which contains 30% available chlorine. Determine how much of bleaching powder is required annually at the water works of 0.3 ppm of chlorine dose is required for disinfection	4

7. Attempt any *one* part of the following: 10*1 = 10

Qno	Questions	CO
(a)	Discuss Activated Sludge process with suitable diagram.	5
(b)	Explain "Vermicomposting" in brief. Also explain advantages of Vermicomposting	5
