Roll No: $\square$
BTECH
(SEM VI) THEORY EXAMINATION 2021-22
THEORY OF MACHINE
Time: 3 Hours
Total Marks: 100
Note: 1. Attempt all Sections. If require any missing data; then choose suitably.

## SECTION A

## 1. Attempt all questions in brief.

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :--- |
| a. | Describe the binary, ternary and quaternary joint in a chain. | 2 | 1 |
| b. | What do you understand by interference? | 2 | 2 |
| c. | What is the difference between flywheel and governor? | 2 | 3 |
| d. | What do you understand by instantaneous center? | 2 | 1 |
| e. | What is constrained motion? Define. | 2 | 1 |
| f. | Discuss types of transmission system. | 2 | 4 |
| g. | Write short notes on Lower pair and higher pair. | 2 | 1 |
| h. | What do you understand by degree of freedom? | 2 | 3 |
| i. | Write short notes on Coefficient of fluctuation of energy. | 2 | 3 |
| j. | Discuss the types of follower. | 2 | 1 |

## SECTION B

## 2. Attempt any three of the following:

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :--- | :--- |
| a. | Describe the velocity and expression for a quick return shaper <br> mechanism. | 10 | 1 |
| b. | What do you understand by effort and power of governor? Find its <br> expression. | 10 | 4 |
| c. | What is the difference between absorption and transmission <br> dynamometer? Also explain torsion dynamometer. | 10 | 5 |
| d. | In a porter governor the mass of each ball is 6 kg and mass of sleeve is <br> 40kg; upper arm is pivot at spindle axis and length is 400mm, while <br> lower arm is 250mm long and pivot 40mm away from sleeve axis. <br> Calculate the equilibrium speed of governor for 150mm radius of <br> rotation. Also calculate the effort for this speed. | 40 | 4 |
| e. | What is the difference between involute and cycloidal form of teeth? | 10 | 2 |

## SECTION C

## 3. Attempt any one part of the following:

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :--- |
| a. | Four masses A, B, C and D are lies in a plane at a shaft. The masses are <br> $12 \mathrm{~kg}, 10 \mathrm{~kg}, 18 \mathrm{~kg}$ and 15 kg and radius of rotation is $40 \mathrm{~mm}, 50 \mathrm{~mm}$, <br> 60 mm and 30 mm respectively. The angular position of B, C and D is <br> $60^{0}, 135^{\circ}$ and $270^{0}$ from A. then calculate the balancing mass whose <br> radius of rotation is 100mm. | 4 |  |
| b. | What do you understand by mechanism? Discuss any one inversion of <br> double slider crank chain. | 10 | 1 |

$\square$

## 4. Attempt any one part of the following:

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :--- |
| a. | Describe the working of Gyroscope with the help of suitable example. | 10 | 5 |
| b. | Derive the expression for minimum number of teeth on pinion to avoid <br> interference. | 10 | 2 |

## 5. Attempt any one part of the following:

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :--- |
| a. | Draw the Cam-Profile for a roller follower rotating in clockwise <br> direction with following details: <br> i)Diameter of roller follower=20mm, ii) least radius of cam=30mm, <br> iii)follower lift $=40 \mathrm{~mm}$,iv)Angle of ascent $=60^{\circ}$, v)angle of dwell= $=40^{\circ}$ and <br> angle of descent $=70^{\circ}$ | 4 |  |
| The motion of follower is Uniform acceleration and retardation. If cam <br> is rotating with 300RPM then calculate the maximum velocity and <br> acceleration during ascent | 10 | 2 |  |
| b. | Discuss law of gearing with proper diagram. Also prove the law. | 10 | 2 |

6. Attempt any one part of the following:

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :--- |
| a. | Describe the simple, compound, reverted and epi-cyclic gear train with <br> the help of figure. | 10 | 2 |
| b. | What do you understand by lubrication system? Explain any one type. | 10 | 5 |

## 7. Attempt any one part of the following:

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :--- |
| a. | Two gears A and B are attached in an epi-cyclic gear train. Gear have 36 <br> and 45 teeth respectively; if arm rotate anticlockwise direction with <br> centre of fixed gear A at 150rpm then calculate the speed of gear B; also <br> calculate the speed of gear B if Gear A is not fixed and rotate Clockwise <br> direction at 300rpm. | 10 | 2 |
| b. | What do you understand by gear nomenclature? Explain with the <br> diagram. | 10 | 2 |
